**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-10 are, drawn to a cutting tool, classified in class 30, subclass 388.

Group II. Claims 11-15 are, drawn to an extension assembly, classified in class 16, subclass 110R.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the cutting tool of group I does not require a protective cover set forth in group II. The subcombination has separate utility such as an extension assembly to be used with tools other than the cutting tool set forth in group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3724

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
